

Setting up email accounts with outlook

To add your email account to Outlook - Version 6.0 please open Outlook and then follow the below steps:

- Click 'Tools' then 'Account settings'
 - Click 'new' then 'next'
 - Tick box that says 'maunually configure server settings click 'Next', click 'Next' again
 - Type in your name, email address
 - Choose POP3 as the account type.
 - For the server names for both Outgoing and Incoming, type mail.your-domain-name.ext.
e.g. mail.nswwebdesign.com.au
 - Type in your username e.g. info@nswwebdesign.com.au Also type in your password and click 'Next'.
 - Click 'Finish' on the Congratulations screen then close the window.
 - In Outlook, click 'Send/Receive'. All done
- If you are unable to connect to the smtp server, your ISP may be blocking port 25 from 3rd party use.
- 1) Go into 'Tools' and click 'Account settings'.
 - 2) Select the email address you are using and click on 'change'.
 - 3) Click the 'more settings' tab
 - 4) Click the advanced tab
 - 5) Replace 25 with 2626 for the outgoing (SMTP) port number, then click 'Save'.
